---

PROFESSIONAL SUMMARY

Final-year BCA student passionate about Enterprise UI/UX design, user research, wireframing, and accessibility.

CORE SKILLS & COMPETENCIES

- UX Design: User Research, Information Architecture, User Flows, Wireframing, Usability Heuristics, Task Analysis

FEATURED PROJECTS

1. AssetPulse - Enterprise Asset Management Dashboard Concept (UI/UX Case Study)

- Conceptualized and designed an enterprise fixed asset tracking and audit dashboard for multi-facility operations.
- Designed an intuitive 3-stage conversion funnel and customer segmentation matrix to guide CRM interfaces.

2. HotelRevAI - Revenue Analysis BI Dashboard for Hospitality

- Engineered an interactive business intelligence dashboard using Power BI, SQL, Excel, and DAX calculations.

3. Bank Marketing Exploratory Data Analysis & Information Design

- Processed and analyzed 45,000+ customer records to identify conversion inflection points for term deposits.

EDUCATION

Bachelor of Computer Applications (BCA)

Graduation Year: 2026 | Key Coursework: Human-Computer Interaction, Web Development, Database Management

DESIGN PHILOSOPHY

"Enterprise software should be as intuitive and delightful as consumer apps, without sacrificing data density."
